PRODUCT MANAGEMENT | WEB & CUSTOMER-FACING PRODUCTS | SAAS DELIVERY

Dallas, TX (Open to Remote) • (501) 613-6997 • jonathan.west501@gmail.com • linkedin.com/in/jonathanwest501 • jaywest501.github.io/PMPortfolio

PRODUCT PROFILE

Product-minded implementation leader and former Business Analyst with 3+ years across SaaS delivery, discovery, requirements, and customer-facing technology. Manage 16–18 concurrent enterprise implementations, translate recurring customer friction into clearer product and workflow decisions, and coordinate technical delivery through UAT and go-live. Built an AI-assisted HTML intake tool adopted across the Implementation team and independently shipped MileStory, a customer-facing mobile app. MBA graduate and U.S. Air Force veteran.

CORE STRENGTHS

Product Discovery & Requirements • Prioritization & Roadmapping • Client Discovery & Feedback • Release Readiness & UAT • Cross-Functional Delivery • Workflow & UX Thinking • SQL & Salesforce • Process Improvement

PROFESSIONAL EXPERIENCE

Implementation Project Manager | Nelnet

Oct 2024 - Present

- Manage 16–18 concurrent higher-ed enterprise SaaS implementations, leading discovery, documenting requirements, identifying dependencies, coordinating UAT, and driving work through go-live.
- Partner with engineering, support, and customer stakeholders to clarify requirements, resolve technical questions, and maintain alignment across connector upgrades, SAML integrations, and payment plan builds.
- Identified a manual intake bottleneck and independently designed and built an AI-assisted HTML Business Requirements Questionnaire, translating user needs into a simpler workflow adopted across the Implementation team.
- Inherited a project with outdated requirements, went directly to the client to rebuild discovery and documentation, clarified priorities, and brought delivery back on track.

Associate Project Manager | SpectrumVoIP

Jul 2024 - Oct 2024

- Led end-to-end SaaS project delivery across concurrent client engagements, coordinating scope, timelines, dependencies, and cross-functional teams while maintaining a 98% on-time completion rate.
- Created SOPs and workflow documentation that standardized team execution and improved operational efficiency by 20%.

Junior Business Analyst | MetaSource

Feb 2022 - Dec 2023

- Gathered and documented business and technical requirements through stakeholder discovery, coordinated cross-functional delivery teams, and used SQL and Salesforce to analyze data and support decisions.

Security Forces Supervisor | U.S. Air Force

Apr 2014 - Nov 2021

- Led a 15+ person team through complex, concurrent operational initiatives, coordinating resources, communicating risk, and delivering consistent outcomes under incomplete information.
- Built SOPs, training programs, and process documentation from scratch, creating repeatable standards where none existed.

INDEPENDENT PRODUCT WORK

Founder & Product Owner | MileStory

2025 - Present

- Independently conceived, designed, and shipped a React Native / Expo mobile app on iOS and Google Play, owning discovery, feature definition, prioritization, release decisions, and post-launch iteration.
- Built on Supabase with Strava webhook sync and social features; use observed user behavior to prioritize enhancements and define a premium tier while balancing usability, technical constraints, and product goals.
